PC60TPAG 7.0 AMP 4-1/2 IN. SMALL ANGLE GRINDER/CUT-OFF TOOL

★★★★★ (0) [Write a review](#)

Designed for aggressive performance, our 4-1/2 in. Small Angle Grinder/Cut-Off Tool offers a compact, lightweight platform that can handle tough jobs. It's ideal for contractors, welders, fabricators, masons, and other tradesmen needing a tool for grinding, metal cutting, polishing, and tuck-pointing. One of the lightest grinders on the market at just 4.1 pounds, the 7-amp motor delivers up to 11,000 RPM. The cast metal gear housing helps to dissipate heat, ensuring that it will stand up to big jobs. In addition to a 3-position handle for comfort and control, it also offers a comfortable and convenient paddle switch that automatically shuts off if dropped. With more and more job sites using a traditional grinder with a cut off guard for cutting metal, this tool includes a grinding guard and cutting guard. The two guards are tool-free and can be easily adjusted to control the spark path, increasing productivity and safety on the jobsite. Additional accessories include a side handle, grinding wheel, cut-off wheel, and a wrench.
